

Group number: 5

Group members, including the manager name of the project your group is working on:

Members: Omar Osman, Justin Cheng, Haamed Rahman, Ludovic Anglade

Manager: Aditi Bansal

What external modules/frameworks you will be using:

- React(frontend)
- PostgreSQL(database)
- Express/Node(backend)
- Auth0(Authentication)
- Selenium(Web scraping)

How you propose to distribute the work among group members.

We will distribute the work amongst ourselves based on the web-pages we plan to implement in our project, such that every group member gains experience in full-stack web development.

Omar: Login/Register, Homepage

Justin: Food Item Search Page

Haamed: Dining Hall Page (contains curated menu)

Ludovic: Dining Hall List Page, Preference Curation Page (redirected to)
